a. The new definition of unemployment applies from 2001 Q1 onwards, entailing a break in the series. (See www.ine.es).

Note: As a result of the change in the population base (2001 Census), all the series in this table have been revised as from 1996. In addition, since 2005 Q1 the new obligatory variables referred to in Regulation (EC) 2257/2003 (on the adaptation of the list of labour force survey characteristics) have been included, a centralised procedure for telephone interviews has been set in place and the questionnaire has been modified. Thus, in 2005 Q1, there is a break in the series of some variables. For further information, see www.ine.es.

b. Up to 2004 Q4, this series includes the unemployed who left their job more than three years earlier.
